

## Exp NO:4                      Data modelling and form design for a business application in Zoho Creator.

### Aim

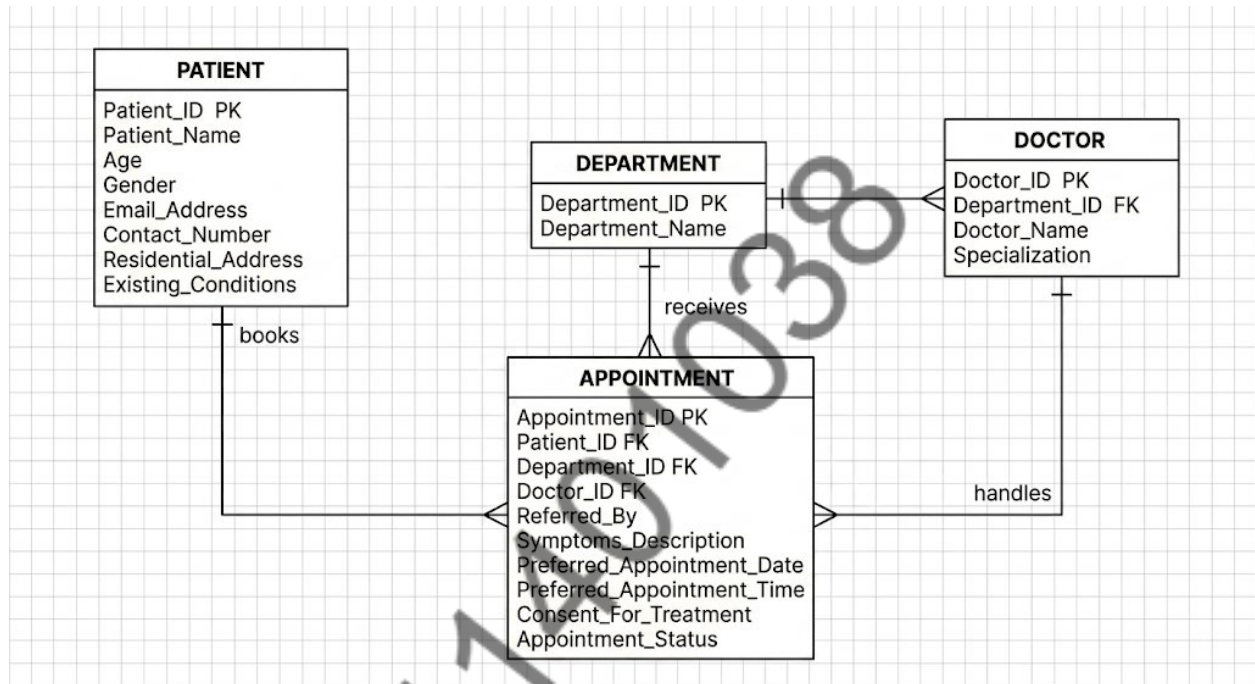

To design and develop a **Patient Appointment & Scheduling Management** application in **Zoho Creator** using all thirteen Basic Field types available in the Form Builder. The application is designed to collect patient details, contact information, medical details, appointment preferences, and treatment consent, and to store the submitted information in an appointment report for front-desk management.

### Procedure

1. Open **Zoho Creator** and sign in using a Zoho account.
2. Create a new application named **Patient Appointment & Scheduling Management**.
3. Create a form named **Appointment\_Booking\_Form**.
4. Create four sections in the form:
  - Patient Details
  - Contact Details
  - Medical Details
  - Scheduling & Consent
5. Add the required **13 Basic Fields** to the form:
  - Name – Patient Name
  - Email – Email Address
  - Address – Residential Address
  - Phone – Contact Number
  - Single Line – Referred By
  - Multi Line – Symptoms Description
  - Number – Age
  - Date – Preferred Appointment Date
  - Time – Preferred Appointment Time
  - Drop Down – Department
  - Radio – Gender
  - Multi Select – Existing Conditions
  - Checkbox – Consent for Treatment
6. Configure the required fields as **mandatory** and provide appropriate options for fields such as Gender, Department, and Existing Conditions.
7. Configure validations such as **Age between 0 and 120**, valid email and phone formats, and prevention of past appointment dates.
8. Make the **Consent for Treatment** checkbox mandatory so that the form cannot be submitted without patient consent.
9. Save and preview the form to verify that all fields and validations work correctly.
10. Create a **List Report** named **Appointment\_Booking\_Report** using the submitted form data.

11. Enter at least **three sample patient appointment records** and verify that they appear correctly in the report.
12. Use the report to view and filter appointment requests based on **Department** and **Preferred Appointment Date**.
13. Capture screenshots of the **Form Builder, Live Preview, and Report View** as required for the lab record.

## ER Diagram:

## Form Builder

The screenshot shows the 'Form Builder' interface for an 'Appointment Booking Form'. The interface is divided into three main sections: a left sidebar with field types, a central workspace, and a right sidebar with field properties.

**Basic Fields:**

- Name (Text)
- Email (Text)
- Address (Text)
- Phone (Text)
- Single Line (Text)
- Multi Line (Text)
- 123 (Number)
- Date (Text)
- Time (Text)
- Drop Down (Text)
- Radio (Text)
- Multi Select (Text)
- Checkbox (Text)

**Advanced Fields:**

- Decision box (Text)
- Rich Text (Text)
- URL (Text)
- Image (Text)

**Field Properties:**

- Field name: Patient Name
- Field link name: patient\_name
- View Field References
- Validation: Mandatory
- Display Fields: First Name, Last Name, Suffix
- Data Privacy: Contains personal data (Y)
- Data Security: Data encryption is not supported.
- Visibility: Show field to: Everyone
- Appearance: Field type: Name, Field size: Medium
- Description

**Form Structure:**

- Patient Details**
  - Patient Name \*
  - Age \*
  - Gender \*
- Contact Details**
  - Email Address
  - Contact Number \*
  - Residential Address
- Medical Details**
  - Referred By
  - Department \*
  - Existing Conditions
  - Symptoms Description
- Scheduling & Consent**
  - Preferred Appointment Date \*
  - Preferred Appointment Time
  - Consent For Treatment \*

## Output:

The screenshot shows the final 'Appointment Booking Form' output. The form is titled 'Appointment Booking Form' and is divided into four main sections: Patient Details, Contact Details, Medical Details, and Scheduling & Consent.

**Patient Details:**

- Patient Name: First Name, Last Name
- Age
- Gender: Male, Female, Other

**Contact Details:**

- Email Address
- Contact Number \*
- Residential Address: Address Line 1, Address Line 2
- City, District, State / Province, Postal Code, Country

**Medical Details:**

- Referred By
- Department: General Medicine
- Existing Conditions: Diabetes, Hypertension, Asthma, Heart Disease, Allergic Reaction, None
- Symptoms Description

**Scheduling & Consent:**

- Preferred Appointment Date \*
- Preferred Appointment Time
- Consent For Treatment \*
- Consent to notification and broadcast

**Footer:** Submit

## Result

The **Patient Appointment & Scheduling Management** application was successfully designed and developed in **Zoho Creator** using all thirteen Basic Field types. The application captures patient details, contact information, medical details, preferred appointment date and time, and treatment consent. The submitted appointment records are stored and displayed in the **Appointment\_Booking\_Report**, enabling the front desk to view, filter, and manage patient appointment requests efficiently.
